An important feature of the history of life is that it has not been a steady progression of change. There have been bursts of evolutionary change as newly evolved groups undergo adaptive radiations and greatly increase in ...

### Biology - Chapter 9 Flashcards | Quizlet

Biology is the scientific study of life. It is a natural science with a broad scope but has several unifying themes that tie it together as a single, coherent field. For instance, all organisms are made up of cells that process hereditary information encoded in genes, which can be transmitted to future generations. Another major theme is evolution, which explains the unity and diversity of life.
