Cancer Mortality And Morbidity Patterns

Efforts to reduce global cancer disparities begin with an understanding of geographic patterns in cancer incidence, mortality, and prevalence. Using the GLOBOCAN (2002) and Cancer Incidence in Five Continents databases, we describe overall cancer incidence, mortality, and prevalence, age-adjusted temporal trends, and age-specific incidence patterns in selected geographic regions of the world.

Patterns of cancer incidence, mortality, and prevalence ...

Biomedical specialists could be interested in historical aspects of cancer treatment and prevention, mechanisms of carcinogenesis, cancer risk factors, cancer mortality and morbidity trends in the U.S. over a more than 50-year period, as well as specific features of cancer histotypes, and recent approaches to cancer prevention.

Cancer Mortality and Morbidity Patterns in the U.S ...

Objective The global burden of colorectal cancer (CRC) is expected to increase by 60% to more than 2.2 million new cases and 1.1 million deaths by 2030. In this study, we aim to describe the recent CRC incidence and mortality patterns and trends linking the findings to the prospects of reducing the burden through cancer prevention and care.

Global patterns and trends in colorectal cancer incidence ...

Objective: The global burden of colorectal cancer (CRC) is expected to increase by 60% to more than 2.2 million new cases and 1.1 million deaths by 2030. Cancer incidence and mortality worldwide: Sources, methods ...

The GLOBOCAN 2018 estimates presented in this report indicate that there will be 18.1 million new cases of cancer and 9.6 million deaths from cancer in 2018. Cancer is an important cause of morbidity and mortality worldwide, in every world region, and irrespective of the level of human development.

Global cancer statistics 2018: GLOBOCAN estimates of ...

Cancer is widely recognized as a global public health problem. Breast, prostate, and cervical cancer are among the most frequent types in developing countries. Assessing their incidence and mortality by regions and municipalities is important to guide evidence-based health policy. Our aim was to describe the incidence and mortality trends for breast, cervical, and prostate cancer across ...

Patterns of breast, prostate and cervical cancer incidence ...

Breast cancer mortality was 41% higher among black women (29.2 deaths per 100,000 population) than white women (20.6 deaths per 100,000 population). Breast cancer death rates decreased during 2010–2014 among both blacks and whites, although differences in trends by race and age were found .

Patterns and Trends in Age-Specific Black-White ...

1. Introduction. Prostate cancer is the second most commonly diagnosed cancer and the sixth leading cause of cancer death among men worldwide, with an estimated 1 276 000 new cancer cases and 359 000 deaths in 2018 .The worldwide prostate cancer burden is expected to grow to almost 2.3 million new cases and 740 000 deaths by 2040 simply due to the growth and aging of the population .

Recent Global Patterns in Prostate Cancer Incidence and ...

Using Cox regression, we examined the association between quartiles of dietary patterns and cancer mortality, adjusted for potential confounders, overall among all participants and stratified by race. A total of 873 cancer deaths were observed over the 10-year observation period: 582 (66.7%) in Whites and 291 (33.3%) in Blacks.

Mortality Patterns -- United States, 1993 . In 1993, a total of 2,268,553 deaths were registered in the United States -- 92,940 more than in 1992 and the highest number ever recorded (1). In addition, life expectancy at birth declined for the first time since 1980.

Mortality Patterns -- United States, 1993

Background Prostate cancer (PC) primarily affects elderly men. However, the specific features of cases diagnosed at younger ages (<65 years) suggest that they may represent a different clinical subtype. Our aim was to assess this suggestion by contrasting the geographical PC mortality and hospital admissions patterns in Spain for all ages to those in younger men.

Different spatial pattern of municipal prostate cancer ...

In this review, we describe these changing global incidence and mortality patterns for select common cancers and the opportunities for cancer prevention in developing countries. Cancer Epidemiol Biomarkers Prev; 19(8); 1893-907. ©2010 AACR. This article is featured in Highlights of This Issue, [p. 1887][1] [1]: /lookup/volpage/19/1887
