The Power Of Cities In

Cities are our future We live in an increasingly urban world which is shaping our environments and our future. Currently, over half of the global population live in cities and it is estimated that this percentage will rise to 70% by 2050. Cities are both the culprits and the source of innovative solutions to megatrends such as climate change.

Today only 600 urban centers generate about 60 percent of global GDP. While 600 cities will continue to account for the same share of global GDP in 2025, this group of 600 will have a very different membership. Over the next 15 years, the center of gravity of the urban world will move south and, even more decisively, east.

Urban world: Mapping the economic power of cities | McKinsey

The following is a list of the most populous incorporated places of the United States. As defined by the United States Census Bureau, an "incorporated place" includes a variety of designations, including city, town, village, borough, and municipality. A few exceptional census-designated places (CDPs) are also included in the Census Bureau's listing of incorporated places.

Political system - Political system - Cities: Cities first emerged as complex forms of social and political organization in the valleys of the Euphrates and the Tigris, the Nile, the Huang He, and the Yangtze. These early cities broke dramatically with the patterns of tribal life and the rural societies from which they sprang. Kinship as the basis of society was replaced by status determined ...

Political system - Cities | Britannica

A city can be defined by its administrative boundaries (city proper). UNICEF defines city proper as "the population living within the administrative boundaries of a city or controlled directly from the city by a single authority." A city proper is a locality defined according to legal or political boundaries and an administratively recognised urban status that is usually characterised by some ...
