Modern portfolio theory looks for the correlation between the expected return and the expected volatility of different potential investments. ... Perfect Correlation .

How Is Correlation Used in Modern Portfolio Theory?

1 Correlation is a measurement between -1 and 1, which indicates the linear relationship between two variables. If there is no relationship between two variables, the correlation coefficient is 0. If there is a perfect relationship, the correlation is 1. And if there is a perfect inverse relationship, the correlation is -1.
